

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

PREFATORY NOTE

THIS sixty-ninth yearly issue of the English Catalogue of Books comprises the titles of works published during 1905, also of some received too late for inclusion in the sixty-eighth issue.

Titles and index are in one alphabet. The main entry of each work begins with the author's surname (if given on the title page) in **heavy type**. As an index to these 'Author' records, the title, commencing with its most important word (which usually indicates the *classification* to which the work belongs) or with its first word, is repeated in the same alphabet, with that word in *italics*, which in the main entry is in **thick type**.

The 'Transactions' of Learned Societies are recorded in an Appendix, as also the 'Series' and 'Libraries' issued by some publishers.

The names and addresses of the publishers of Great Britain and Ireland will be found at the end of the volume, followed by those of the principal publishers in the United States and in Canada. The telegraph and cable addresses and telephone numbers have been added when known.

Hearty thanks are due to many publishers, secretaries, authors, and bibliographers who have assisted in making this book more correct and comprehensive than it otherwise would have been.

The Editor will be glad to have particulars of author, price, publisher, and month of publication of any work which may have been omitted. Information as to each book should be on a *separate* slip of paper, the size of a large post card. It should be addressed to

The Editor of The English Catalogue of Books,

Publishers' Circular Office,

London, E.C.

January 15, 1906.

The Names, Addresses, and Telephone Numbers of PUBLISHERS are given at the end of this volume.

See Appendix A for Books reported while this volume was being printed.

See Appendix B for Series of Books and Transactions of Societies.

. In addition to the names of book-sizes, such as cr. 8vo., royal 8vo., &c., the sizes are also given where possible in inches, 1 inch = 2½ centimetres.

DIRECTORY OF PUBLISHERS

All the Publishers have been invited by post to send us their Telegraphic Addresses and Telephone Numbers. Those sent will be found below between square brackets [], and separated from each other by a semicolon (;).

This list of Publishers, with their Addresses, has been principally compiled with a view to supplying information regarding the books in the 1905 English Catalogue. This will explain the inclusion of many firms in the list who can scarcely, in the strict acceptation of the term, be called Publishers, since the publication of books forms only an occasional portion of their business.
